

Instructions for Pre-Employment Medicals

Your company has requested that you attend the Wheelers Hill Clinic for a Pre-Employment medical examination. Please try to arrive a few minutes early to complete the relevant paperwork.

If you wear glasses for reading or driving, please bring them with you.

Upon arrival, check in at the reception desk.

The receptionist will give you some forms to complete. Fill in the forms as well as you can. The doctor will go over any areas left blank. You will need to return the completed form to reception.

Whilst you are at the clinic, we will ask you for a urine specimen, so please do not arrive with an empty bladder. We test your urine for any traces of protein, blood, and glucose. Some companies may also request urine drug screening. If this is required, your written consent will be necessary.

A staff member will then spend 5-10 minutes with you. They will record your weight, height, test your vision, and take your blood pressure.

We may also conduct a hearing, breathing, or other additional tests if specifically requested by your referring company. This may take an additional 15-30 minutes.

The doctor will then complete the examination and review your answers on the Pre-Employment Form.

We then relay the results of your Pre-Employment Medical to your company within 24 hours.

Regards,

Wheelers Hill Clinic
